Built-in fall detection provides comprehensive protection (for the necklace style only)

Geofence alerts for notifying about the users' locations

A single tap sends notifications and location for prompt assistance

Step count records daily walking progress

GPS & WiFi tech expands monitoring beyond home

The Mobile Lite R35-C is a breakthrough, new-generation 4G/LTE PERS locator designed as a wristwatch/necklace. With a more compact design than its predecessor, it is ideal for seniors looking to maintain an active and independent lifestyle. Its user-friendly interface makes it easy to use, eliminating the added complexity of a smartwatch. With a simple press of a button, assistance can be quickly summoned through Mobile Lite R35-C and the location will be immediately communicated. Its small size allows for convenient wearing on the wrist, making it the smart and perfect companion for elders to maintain both safety and agility effortlessly.

The Mobile Lite R35-C is a great companion for sport and health, thanks to its step count feature. With built-in fall detection (for the necklace style only), comprehensive care for all seniors is achieved. Leveraging PERS with GPS and Wi-Fi technology, users can call for help through the button when an emergency arises and activate two-way communication right away, significantly shortening caregivers' response time. All positioning information can be accessed via Care Alert Platform. The innovative design of the Mobile Lite R35-C's charging stand enhances the convenience of charging anytime and anywhere. The Mobile Lite R35-C is the best choice for elders who pursue an active and worry-free aging life.

Switch to the wristwatch from the necklace in two easy steps:

Effortless, smooth, and hassle-free charging experience.
